- ❌ Question 1
Read the statements in the table below, and decide if they apply to homologous structures, analogous
Points: 0 of 1
- ❌ Question 2
Which of these factors should be compared to best determine how closely species are related to each
Points: 0 of 1
- ✅ Question 3
Which of the following best describes the importance of similar amino acid sequencing of a protein I
Points: 1 of 1
- ⚠️ Question 4
Click on the boxes that show the most significant divergence from human forelimbs.
Points: 1 of 2
- ✅ Question 5
The DNA of the following four species were compared to find out if any evolutionary relationship ex
Points: 1 of 1
- ✅ Question 6
Which animal is the least related to Basilosauridae?
Points: 1 of 1

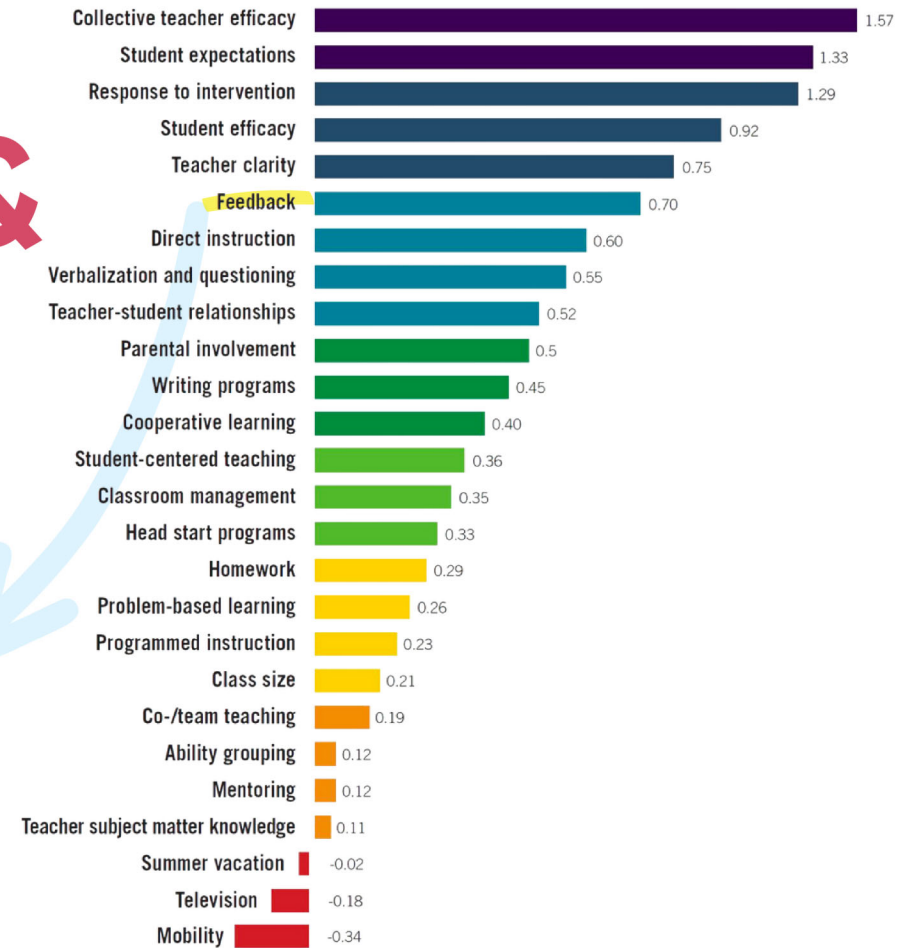

“The dashboard is easy to analyze by TEK or student. When we meet for biweekly data talks, this breakdown allows us to create small groups based on specific gaps, and provide reteach opportunities based on how students performed on that standard.”
